ABOUT ME

Information Technology student with a strong foundation in Artificial Intelligence, Machine Learning, and full-stack development. Passionate about building scalable, data-driven solutions that solve real-world problems. Experienced in developing AI-powered platforms, predictive models, and analytical dashboards. Seeking opportunities to apply technical skills in innovative and impactful projects.

INTERNSHIP

Intern, V.O. Chidambaranar Port Trust
Gained hands-on exposure to India's maritime operations at one of the country's major ports. Explored logistics management systems, port automation technologies, and supply chain workflows that keep global trade moving. A deep dive into how technology powers large-scale infrastructure and operations.

EDUCATION

Loyola_ICAM College of Engineering and Technology2023 – 2027

BATCH'23 STREAM-COMPUTER SCIENCE,
BMC MATRICULATION HIGHERSECONDARY SCHHOL

TECHNICAL SKILLS

Programming Languages
Python, Java

Data & Analytics
Power BI, Microsoft Excel, Pandas, NumPy

Machine Learning
Scikit-learn, Predictive Modeling, Data Analysis

Web Technologies
HTML, CSS, JavaScript tools & Platforms: Git, GitHub

PROJECTS

ACDS - Autonomous Company Diagnostic System

- Developed an AI-powered SaaS platform to monitor and analyze organizational performance
- Integrated LLAMA 3.3 (Groq) for generating intelligent business insights
- Designed system to analyze data from HR, sales, and operations departments
- Implemented risk detection and automated recommendation generation

Sportizen

- Developed a social networking platform for sports enthusiasts
- Enabled users to share achievements and connect with like-minded individuals
- Focused on user engagement and community-driven interaction features
